### DETAILED ACTION

1. This office action is in response to communication filed on 11/6/09. Claims 1-9 are pending on this application.

### ***Response to Arguments***

2. Applicant's arguments with respect to claims 1-9 have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 101***

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 8 and 9 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims 8 and 9 pertain solely to a computer program that is not embodied in any computer-readable media.

*"Similarly, computer programs claimed as computer listings per se, i.e., the descriptions or expressions of the programs, are not physical "things." They are neither computer components nor statutory processes, as they are not "acts" being performed. Such claimed computer programs do not define any structural and functional interrelationships between the computer program and other claimed elements of a computer which permit the computer program's functionality to be realized. In contrast, a claimed computer-readable medium encoded with a computer program is a computer element which defines structural and functional*

*interrelationships between the computer program and the rest of the computer which permit the computer program's functionality to be realized, and is thus statutory. See Lowry, 32F.3d at 1583-84, 32 USPQ2d at 1035. See Interim Guidelines on 35 USC 101, Annex IV (a): Functional Descriptive Material.*

#### ***Allowable Subject Matter***

4. Claims 1-7 are allowed.
5. The following is a statement of reasons for the indication of allowable subject matter: The allowable subject matter in claims 1, 5 and 7 pertain to the range of the phase control in the prephasing process is about 10 degrees.

#### ***Conclusion***
